

Revitalise your sage People System

...with a Technical Adoption Overview

Ensure your Sage People System is running effectively

With enhanced digitalisation and HR automation, there is an increased demand for HR to get more involved in strategic planning and market analysis. Both the current set of changes and those required in the future will challenge HR to adapt with new skills and process requirements in addition to providing the expertise to help business leaders develop skills to respond. While not all change will be as abrupt or profound as the adaptations required by unanticipated and unprecedented business disruption, it's clear that the tools they are using are critical to effective and engaging experiences.

Therefore, it is essential to understand how efficient your Sage People HR System is working and if you are utilising it to its full effect whilst continuing to deliver against your strategic business objectives.

The Benefits of this Service

Address those Sage People challenges that you've been meaning to resolve:

- Review if your system is addressing your needs and set-up for future demands;
- Enhance your system;
- Take advantage of any new functionality;
- Identify and establish a plan to address any additional investment, training and support needs.

Often, this can be a great starting point to understand where there are gaps - systems evolve, businesses progress and change over time, which can often mean that the system you originally implemented no longer meets your needs.

Take advantage of our specialist Sage People HRIS consultants extensive experience in providing customers with the tools and knowledge to revive your Sage People HR System.

A Simple 4 Step Process

1

Once you have booked your Sage People HR System Adoption Overview, a Tugela People Managed Services HRIS consultant will schedule a call with you to determine your Sage People priorities and the areas of focus.

2

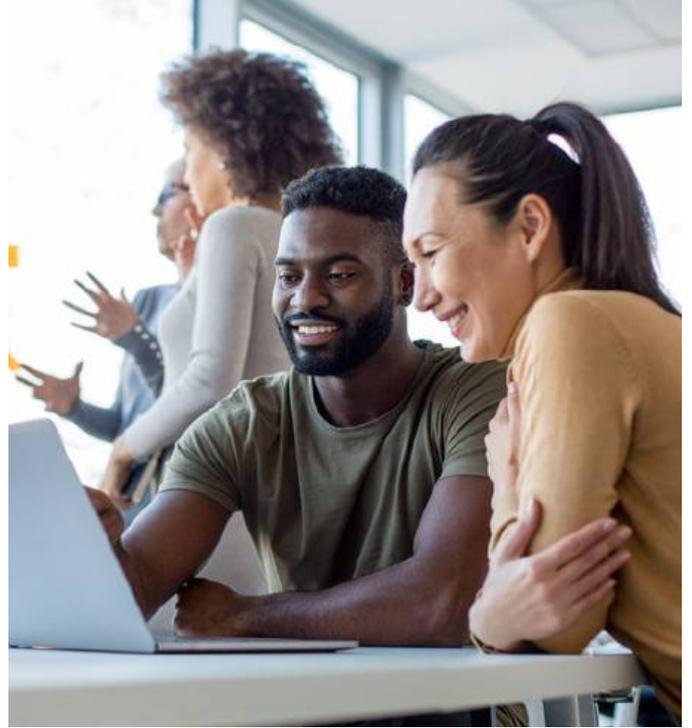

We will collaboratively review your Sage People system and functionality, determining where there is scope for development.

3

The findings of the review will be documented and presented to you with a detailed written report outlining our findings, recommendations, and advice on the best next steps for your business, based on your priorities.

4

We can then discuss how to take any recommendations forward in the form of a further system health check, scope out an additional project or provide ongoing support via our Managed Services team.

Ongoing Support

Once you have completed the Technical Adoption overview, you can take advantage of our ongoing Managed Services support. Depending on your requirements and budget, you can choose from either our [Retained Monthly Support](#) or [Support Bundles](#).

Having ongoing Managed Services provides essential assistance to ensure that your system continues to support your people function and company. Additionally, it enables you to have all of the agreed recommendations highlighted in the Technical Adoption Overview implemented.

We act as an extension of your team so that you can enjoy the benefits of your system with greater flexibility and less expense. And because we understand the people challenges that companies face, especially high growth companies, we offer solutions that work best for you, your people, and your processes.
